

Protect Your Car Against
 Pollen, Dust & Pollutants

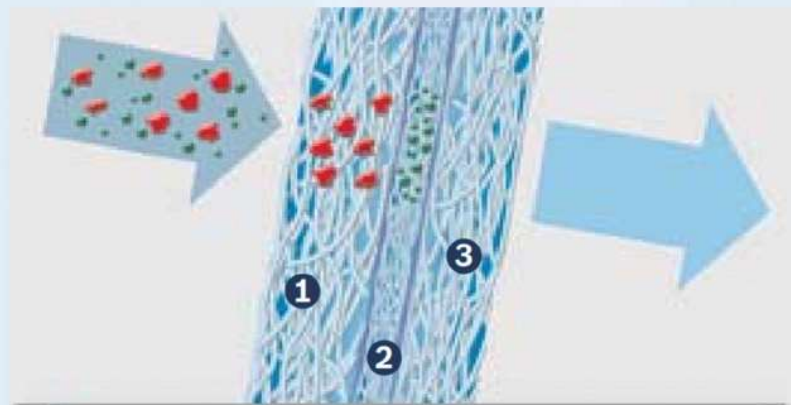

HEPA Premium Cabin Air Filter

Magnified at 300x
 HEPA Media
 Three Layers

Magnified at 300x
 Non-HEPA Media
 Two Layers

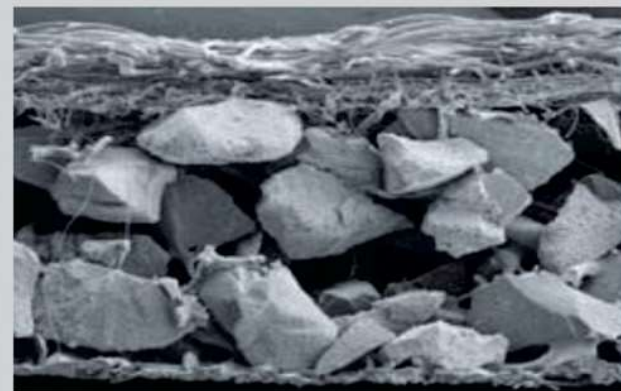

- Dust, pollen and dirt particles
- Particulates, diesel soot and bacteria

1 The support layer is hard and designed to support and protect the media on the surface of the filter.

2 The HEPA layer is designed to trap microscopic pollutants including pollen, mold and common allergen

3 The static cotton layer is included to improve the particle-holding capacity as well as prolonging the life of the filter. Unlike other cabin air filters, TEMCO constructs their filters with an extra layer to combat against even the smallest particles.

Active Carbon Cabin Air Filter

Health protection through reliable filtration of soot, pollen, dirt particles and pollutants: particularly important protection for anyone with allergies or asthma

Activated carbon cabin filters provide extra protection by absorbing gases that are odorous & harmful to health, e.g. ozone and nitrogen oxide

Large filter surface and microfiber fleece ensure more effective filtration than with cheap filters

The surface of the active carbon looks like a sponge under the microscope. The micropores trap and retain even the smallest impurities, for example harmful hydrocarbons from exhaust fumes and ozone.
